Album „Starship“  
01JAN21

It just took him 6 months to deliver the successor of his debut album „Skywalk“. **The Veil of Babylon** mastermind Luke Hofmeister continues his personal solo-project journey and wants to repeat the many national and international chart surprises (**#21** Official Metal/Rock Charts Germany, **#78** iTunes Album Charts Netherlands, **#199** iTunes Album Charts Germany). His new creation is named „Starship“.

By writing, playing and producing every single tone of the album in his home studio, Luke continues to follow the biggest secret of his success: A personal, intimate atmosphere that catches every listener from the first tone and leads him through an incredible journey of eight wonderful tracks. „*This ensures that the consumer experiences a very close and authentic atmosphere as if I would sit beside him or her. That's something which was very important to me*“, says Lukas.

And he progresses in his musical style, optimizes core elements and structures of the songs which sounds much more compact in relation to the first album. Acoustic Rock/Pop elements combined with powerful Rock tunes that reminds the listener to the mighty and melodic 80's Classic Rock hits. Catchy melodies, powerful Guitars, fragile strings.

„Starship“ sounds mature, brave and personally. Hofmeister processes topics and stories related to his work life in the aviation industry. He tells the stories of all tracks from the bird's-eyes view. As a pilot, eagle or astronaut. Always keeping the view from up above. This beams the audience right into the core of the songs and stories.

It's an album against the flow and against clean, plain and perfect song structures of the industry. An eight course menu full of different flavours, spices, sweets and bitterness. Sit back, relax, fasten your seatbelt and enjoy the flight with „Starship“.
